

FIG. 1

FIG. 3

FIG. 5

Fig 6

Fig. 7

The diagram illustrates a selection circuit. It features a horizontal row of four rectangular blocks, each representing a selection input. From left to right, these blocks are labeled: '802 selection 1', '804 selection 2', '805 selection 3', and '808 selection 4'. Below each of these four blocks is a label 'selection 1 threshold', 'selection 2 threshold', 'selection 3 threshold', and 'selection 4 threshold' respectively. A vertical arrow points from each threshold label to its corresponding selection block. To the right of this row is a single rectangular block labeled '810 selection N'. A horizontal line connects the right side of the '808 selection 4' block to the left side of the '810 selection N' block. Below the '810 selection N' block is the label 'selection N threshold', with a vertical arrow pointing from it to the block.
